

# Notes to the teacher

**Coloring in English** is intended for basic literacy and/or beginning ESL learners of all ages. It works best as a low-pressure, fun activity. Adults and children can relax and color as they learn new vocabulary and important sight words.

Most of the pages are repeated side-by-side, usually as "mirror images" with FULL CAPS on one side and Upper and Lower Case print on the other. The learners can color whatever appeals to them, all or part of either picture, or both. They will naturally compare the words in full caps with those not in caps.

There are a few "extra" pictures and inconsistencies in format added for fun and to encourage questions.

I hope your students have as much fun coloring these pages in English as my editors and I have had putting this book together.

Tracy Speelman
