

1.2 Numbers

13	30
14	40
15	50
16	60
17	70
18	80
19	90
3	three
3 rd	third
33	thirty three
4 th	fourth
15 th	fifteenth

NOTES: This game will require a little explanation. The teens are matched with the “tys,” and the other numbers are matched with their equivalents. There are two pronunciation problems in this game. The first is the difficult -teen/-ty distinction, and the second is the difficult /th/ sound. Because the -teen/-ty distinction is hard to hear, after the match has been made, you could say, “Which one am I saying? I have **thirteen** dollars.”
