

Introduction

The descriptions of how to make and use the various games and activities are self-explanatory, so there is no need in this introduction to belabor that point. However, for those of you who are not familiar with our previous books, let me point out that what you are now holding is basically a “cookbook” that tells you how to make and play the game. For each game/ activity there are some samples to get you started. Please feel free to copy them, cut them out, and paste them on index cards – and if possible laminate them. My own collection now fills two large plastic bins.
